

## Safeguarding children, young people and vulnerable adults procedures

### 1.7 E-safety (including all electronic devices with internet capacity)

#### Online Safety

It is important that children and young people receive consistent messages about the safe use of technology and are able to recognise and manage the risks posed in both the real and the virtual world.

Terms such as 'e-safety', 'online', 'communication technologies' and 'digital technologies' refer to fixed and mobile technologies that adults and children may encounter, now and in the future, which allow them access to content and communications that could raise issues or pose risks. The issues are:

*Content* – being exposed to illegal, inappropriate or harmful material

*Contact* – being subjected to harmful online interaction with other users

*Conduct* – personal online behaviour that increases the likelihood of, or causes, harm

#### I.C.T Equipment

- The setting manager ensures that all computers have up-to-date virus protection installed.
- Tablets are only used for the purposes of observation, assessment and planning and to take photographs for individual children's learning journeys.
- Tablets remain on the premises and are stored securely at all times when not in use.
- Photos are deleted off devices at the end of everyday by managers.
- Staff follow the additional guidance provided with the system
- Digital footprints are monitored and checked on Pre-School devices

#### Internet access

- Children never have unsupervised access to the internet.
- The setting manager ensures that risk assessments in relation to e-safety are completed.
- Only reputable sites with a focus on early learning are used (e.g. CBeebies).
- Video sharing sites such as YouTube are not accessed due to the risk of inappropriate content.
- Children are taught the following stay safe principles in an age appropriate way:
  - only go online with a grown up
  - be kind online **and** keep information about me safely
  - only press buttons on the internet to things I understand
  - tell a grown up if something makes me unhappy on the internet

- Staff support children's resilience in relation to issues they may face online, and address issues such as staying safe, appropriate friendships, asking for help if unsure, not keeping secrets as part of social and emotional development in age-appropriate ways.
- All computers for use by children are sited in an area clearly visible to staff.
- Staff report any suspicious or offensive material, including material which may incite racism, bullying or discrimination to the Internet Watch Foundation at [www.iwf.org.uk](http://www.iwf.org.uk).

The setting manager ensures staff have access to age-appropriate resources to enable them to assist children to use the internet safely.

Strategies to minimise risk include:

- Check apps, websites and search results before using them with children.
- Children in Early Years should always be supervised when accessing the internet.
- Ensure safety modes and filters are applied - default settings tend not to ensure a high level of privacy or security. But remember you still need to supervise children closely.
- Role model safe behaviour and privacy awareness. Talk to children about safe use, for example ask permission before taking a child's picture even if parental consent has been given.
- Make use of home visits to inform your understanding of how technology is used within the home and the context of the child with regards to technology.
- Check privacy settings to make sure personal data is not being shared inadvertently or inappropriately. (source: <https://www.gov.uk/government/publications/safeguarding-children-and-protecting-professionals-in-early-years-settings-online-safety>)

### **Personal mobile phones – staff and visitors** (includes internet enabled devices)

- Personal mobile phones and internet enabled devices are not used by staff during working hours. This does not include breaks where personal mobiles may be used off the premises or in a safe place e.g, staff room. The setting manager completes a risk assessment for where they can be used safely.
- Personal mobile phones are switched off and stored in a locked draw where only the Manager and Deputy Manager have a key.
- Staff ensure that contact details of the setting are known to family and people who may need to contact them in an emergency.
- Staff do not take their mobile phones on outings.
- Members of staff do not use personal equipment to take photographs of children.
- Parents and visitors do not use their mobile phones on the premises. There is an exception if a visitor's company/organisation operates a policy that requires contact with their office periodically throughout the day. Visitors are advised of a private space where they can use their mobile.

## **Cameras, videos and other electronic devices with imaging and sharing capabilities are used in the setting**

- Members of staff do not bring their own cameras, video recorders or other electronic devices with imaging and sharing capabilities in to the setting.
- Photographs/recordings of children are only taken for valid reasons, e.g. to record learning and development, or for displays, and are only taken on equipment belonging to the setting.
- Camera and video use is monitored by the setting manager.
- Where parents request permission to photograph or record their own children at special events, general permission is first gained from all parents for their children to be included. Parents are told they do not have a right to photograph or upload photos of anyone else's children.
- Photographs/recordings of children are only made if relevant permissions are in place.
- If photographs are used for publicity, parental consent is gained and safeguarding risks minimised, e.g. children may be identified if photographed in a sweatshirt with the name of our setting on it.

## **Cyber Bullying**

If staff become aware that a child is the victim of cyber-bullying at home or elsewhere, they discuss this with the parents and refer them to help, such as: NSPCC Tel: 0808 800 5000 [www.nspcc.org.uk](http://www.nspcc.org.uk) or ChildLine Tel: 0800 1111 [www.childline.org.uk](http://www.childline.org.uk)

## **Use of social media**

Staff are expected to:

- understand how to manage their security settings to ensure that their information is only available to people they choose to share information with
- ensure the organisation is not negatively affected by their actions and do not name the setting
- are aware that comments or photographs online may be accessible to anyone and should use their judgement before posting
- are aware that images, such as those on Snapshot may still be accessed by others and a permanent record of them made, for example, by taking a screen shot of the image with a mobile phone
- observe confidentiality and refrain from discussing any issues relating to work
- not share information they would not want children, parents or colleagues to view
- set privacy settings to personal social networking and restrict those who are able to access
- not accept service users/children/parents as friends, as it is a breach of professional conduct
- report any concerns or breaches to the designated person in their setting
- not engage in personal communication, including on social networking sites, with children and parents with whom they act in a professional capacity. There may be occasions when the practitioner and family

are friendly prior to the child coming to the setting. In this case information is shared with the manager and a risk assessment and agreement in relation to boundaries are agreed

### **Use/distribution of inappropriate images**

- Staff are aware that it is an offence to distribute indecent images and that it is an offence to groom children online. In the event of a concern that a colleague is behaving inappropriately, staff advise the designated person who follow procedure 1.2e Allegations against staff, volunteers or agency staff.

### **Social media**

- Staff are advised to manage their personal security settings to ensure that their information is only available to people they choose to share information with.
- Staff should not accept service users, children and parents as friends due to it being a breach of expected professional conduct.
- In the event that staff name the organisation or workplace in any social media they do so in a way that is not detrimental to the organisation or its service users.
- Staff observe confidentiality and refrain from discussing any issues relating to work
- Staff should not share information they would not want children, parents or colleagues to view.
- Staff should report any concerns or breaches to the designated person in their setting.
- Staff avoid personal communication, including on social networking sites, with the children and parents with whom they act in a professional capacity. If a practitioner and family are friendly prior to the child coming into the setting, this information is shared with the manager prior to a child attending and a risk assessment and agreement in relation to boundaries is agreed.

### **Family App**

- We use the app Family to share images with our parents of our children during their day at Pre-School.
- Permission is gained from parents before a child's image is put on the app.
- Parents are given a copy of our risk assessment about using this app.
- The Manager monitors the app to ensure only parents of the children attending are connected to the app.
- No parent is to share any image on any social media platform any found doing so will be remove from the app.
- No staff have full access to the content to the app. When they are logged on by the manager/deputy when on duty they will then have certain access to information, once signed out all access is removed.
